EDUCATION

Bachelors in Technology
PBR Vits,
Kavali,2026

Intermediate
Sri Chaitanya Junior College
Kavali, 2022

High School Graduation
Nalanda High School
Kavali,2020.

TECHNICAL SKILLS

- Python, SQL
- Pandas, NumPy, Scikit-learn
- Data Preprocessing
- Feature Engineering
- Model Evaluation (Accuracy, Precision, Recall)
- Prompt Engineering,
- LLM Applications
- LangChain (Basic)
- Hugging Face (Basic)
- Flask
- REST API Development
- MySQL, MongoDB
- AWS (S3 – Basic)

Certifications

- ServiceNow Certified System Administrator
- ServiceNow Certified Application Developer
- Certification in Employability skills and It leadership.
- Data Science, Python and Web Development

PROFESSIONAL SUMMARY

Data Science and Generative AI enthusiast with strong hands-on experience in building machine learning models and AI-powered applications. Skilled in Python, SQL, and data analysis with practical exposure to NLP-based systems, automation workflows, and intelligent decision-making solutions. Developed AI-driven platforms including recruitment automation systems with real-world use cases. Familiar with Generative AI concepts such as prompt engineering, LLM-based applications, and retrieval-augmented systems. Passionate about building scalable AI solutions for business impact.

PROJECTS

PrepGenie – AI-Powered Learning & Career Guidance Platform

- Developed a Generative AI-based platform for personalized learning roadmaps and career guidance
- Built AI modules for resume analysis and mock interviews
- Integrated LLM APIs for dynamic content generation and user interaction
- Designed intelligent workflows for adaptive recommendations
- Implemented backend services for real-time user interaction and data processing
- Improved user learning outcomes through personalized AI-driven suggestions

Tech Stack: HTML, CSS, JavaScript, Python, Flask, OpenAI, MongoDB

SmartHire – AI-Based Recruitment & Interview Automation System

- Developed an AI-powered recruitment platform using machine learning and automation.
- Built NLP-based resume analysis and candidate evaluation system
- Designed automated interview workflows with dynamic question generation
- Implemented REST APIs for AI services and real-time candidate processing
- Simulated AI interview assistant for candidate interaction and scoring
- Improved hiring efficiency through automated screening and evaluation

Tech Stack: Python, Flask, MongoDB, HTML,CSS, JavaScript, Machine Learning

Credit Card Fraud Detection System

- Developed a machine learning model to detect fraudulent transactions using classification algorithms
- Performed data preprocessing, feature engineering, and handled imbalanced datasets
- Improved model performance through evaluation metrics and hyperparameter tuning
- Applied data analysis techniques to identify fraud patterns and anomalies
- Generated insights to support risk-based decision-making

Tech Stack: Python, Pandas, Scikit-learn, Logistic Regression, Matplotlib

LANGUAGES KNOWN

Telugu – Native

English – Professional

Hindi - Intermediate
